Of Foxes and Hedgehogs

“The fox knows many things, but the hedgehog knows one big thing.”

Lesson: Try to be a fox, take different perspectives

Fermi-izing

How many piano tuners are there in Chicago?

Piano Tuners

- Chicago has maybe around ~3 mio people
 - Pianos are expensive, maybe 1-2% of people own them (including institutions like music schools)
- = ~ 50.000 pianos in Chicago

Piano Tuners

- How long does it take to tune a piano? Maybe 2 hours
- How many hours a year does a piano tuner work?

40 hours * 50 weeks = 2000 hours

Take off 20% for travel = 1600 hours

Piano Tuners

- 50000 pianos * 2 hours = 100.000 hours of work
- $100.000 / 1600 = 62.5$
- Answer : Around 63 piano tuners in Chicago

Lesson: Divide big questions into small questions

Bayesian Probability

- Chance of a forty year old woman developing breast cancer in a given year: 1 in 700
- True positive rate of a mammography: 73%
- False positive rate: 12%
- What is the chance of a 40 year old woman with a positive mammography having breast cancer?

Answer: <1%

Flu Season

- 20% have flu
- 90% with the flu turn the tongue depressor black
- 30% without turn it black
- What is the chance of a student with a positive test having the flu?

Answer: ~43%

20 Sick

80 Healthy

18 Sick
with
positive
results

24 Healthy
with
positive
results

~43%

$$\text{Posterior Probability} = 3 / (3 + 4) = 3 / 7$$

3000 total number of
40-year-old women

4 have
cancer

2996 do not
have cancer

tested positive

Bayesian Probability

Lesson: Look at the prior odds and update your belief.

Cognitive Biases and Illusions

System 1 and 2

- System 1: Fast, emotional, effortless
- System 2: Slow, logical, effortful

Lesson: Learn when not to trust your gut and double check

Replacing a Hard Question with an Easier Question

- Has Trump been good for the American economy?
- Where did that answer in your head come from?
- Politics is the mind killer

Lesson: Think before giving the first answer that comes to mind. Did you actually answer the question being asked?

Literature

- Business is the boring stuff, economics is the good stuff
- Game Theory, Mechanism Design, Behavioral Economics, Evolutionary Psychology, Cognitive Psychology, Decision Theory, Bayesian Probability...
